

PHO	PLAYOFFS 8%	TITLE 0.7%	
MIN	PLAYOFFS 100%	TITLE 12.5%	

Some inputs served from the most-recent available build (winprob) — see companion file for detail.

SPREAD	WIN PROB
MIN -12.9	MIN 58% / PHO 42%
PROJECTED SCORE	90% MARGIN RANGE
MIN 83.7 — PHO 81.2	[-19, +27]

The spread is our regression's call (MIN -12.9); the projected box follows our game simulation (implies -2.5); the margin range covers both.

Total — our model: 173.0 · market close: n/a (market shown for context, never our number).

Read

- Our model favors **MIN** by **12.9 pts**; win probability **58%**.
- Availability: **MIN** without E. Cechova, N. Collier (2 OUT); **PHO** without N. Mack, J. Nogic (2 OUT) [+1 GTD] — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- Uncertainty: 90% margin interval [-19.5, +26.7] (home), width 46.2 pts — wide single-game spread.

Availability (excluded from the box; minutes redistributed)

Team	Player	Status	Return
PHO	Natasha Mack	Out	Jul 19
PHO	Jovana Nogic	Out	
PHO	Sami Whitcomb	Day-to-day	Jul 13
MIN	Emma Cechova	Out	
MIN	Napheesa Collier	Out	Jul 20

Projected box (post-availability; MIN→200, PTS→sim score)

Big number = jersey · bold row above the line = projected starting five (top five projected minutes) · IMPACT = points added vs an average player, per 100 possessions (dash = not yet rated) · ± = typical range (80%)

#		PLAYER	IMPACT	MIN	PTS	±	REB	AST	3PM

What tonight means

A win tonight puts **PHO**'s playoff chances at **12%** — a loss drops them to **6%**.

Across both teams that makes this the **8th-biggest playoff-swing game** of this week's 19 remaining games.

PHO if they win **12%**

if they lose **6%**

Playoff swing: **7 points** · Typical seed: about 10th either way.

MIN if they win  **100%**
if they lose  **100%**
Playoff swing: **0 points** · Typical seed: about 2nd either way.

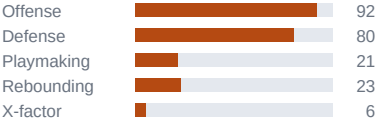

How this works: we replay the rest of the season 10,000 times, split those seasons by tonight's result, and read each team's playoff rate in each pile. These may differ from the headline odds above by a fraction of a point — same simulation family, different run counts.

Starting-five skill profiles

25 A. Thomas

2 K. Copper

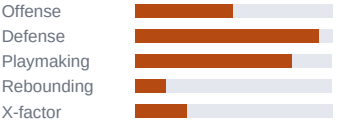

24 D. Bonner

1 N. Brochant

No prior-season skill data yet (first WNBA season)

8 M. Akoa Makani

21 K. McBride

10 C. Williams

1 N. Howard

5 O. Miles

No prior-season skill data yet (first WNBA season)

12 N. Coffey

Bars are league percentiles from each player's most recent full-season profile (the 2025 season); a first-year player has no profile yet and says so. These skill reads are estimated from the public play-by-play available to us — richer tracking data would sharpen them.

How these numbers are made

- Player values = per-minute rates (last-10-games form, season fallback, positional average for players with little game data) × projected minutes; team scoring is scaled to the simulation total.
- Minutes = per-slate projection + injury redistribution under per-player caps — OUT players removed, their minutes reallocated to the healthy rotation, no player over their cap (box normally sums to 200; a team flagged “provisional” has rotation players missing from tonight's model, so its box shows only the modeled minutes and is not inflated).
- Scores / totals = means of a 1M-run Monte-Carlo simulation.
- Spread = regression + home recalibration.
- Uncertainty = calibrated interval (~89% observed coverage at the 90% target).

- Playoff leverage = the season replayed 10,000 times, split by tonight's result.
- Some player-level estimates lean on the limited public play-by-play detail available for this league; richer tracking data would sharpen them.

THE SEASON SO FAR (through 998 games):

Our spread calls miss by an average of 10.8 points · when we make a team a 60%+ favorite, they win 68% of the time · player minutes within +/-5.9, points within +/-3.8 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)

Recent monthly accuracy (average miss, lower is better): May 9.9 · Jun 10.7 · Jul 11.7 · Aug 10.0 · Sep 10.3 · May 11.1 · Jun 10.6 · Jul 12.2 points.
all-games: spread +/-10.8 · minutes +/-5.9 · points +/-3.8
