

MIN by 7.8

63%

MIN win 63% · pick'em (0) · SEA win 37%

Shaded area each side of pick'em = each team's win chance; dark tick = our call.

Projected score SEA 81 — MIN 83 · Total 172

Some inputs served from the most-recent available build (winprob) — see companion file for detail.

Read

MIN is a slight favorite (63% to win).

- MIN is a slight favorite here (63% to win); we project **MIN 83, SEA 81**.
- Projected as a higher-scoring game (total near **172**).
- Availability: **SEA** without E. Magbegor, T. Mair (2 OUT); **MIN** without E. Cechova, N. Collier (2 OUT) — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the **MIN** margin lands between **-7** and **+29** (+ = MIN ahead) — single games swing a lot, and even so MIN loses outright about 37% of the time.

Injuries & availability — out of the projected box

TEAM	PLAYER	STATUS / CAUSE	GAMES MISSED	EXP. RETURN
MIN	Emma Cechova	Knee — out for season	23	Out for season
MIN	Napheesa Collier	Ankle	—	Jul 28
SEA	Ezi Magbegor	Face	3	Jul 28
SEA	Taina Mair	Coach's decision	9	Jul 22

Cause read from the injury feed's report; games missed = the team's games played since the player last appeared; expected return as reported ('TBD' = no date given).

Players to watch

Each side's top two projected scorers — biggest game-changer first (impact = points added vs an average player); the % is the team's scoring each carries.

- MIN** **K. McBride** 21 pts (25% of MIN's scoring) / 3 reb / 2 ast in 38 min · +1.6 impact · **C. Williams** 15 pts (18% of MIN's scoring) / 5 reb / 4 ast in 34 min · +1.2 impact
- SEA** **D. Malonga** 13 pts (17% of SEA's scoring) / 8 reb / 2 ast in 22 min · -0.3 impact · **N. Hiedeman** 13 pts (17% of SEA's scoring) / 3 reb / 4 ast in 27 min · -0.9 impact

Projected box

Big # = jersey · bold above the line = projected starters (top-5 minutes) · IMPACT = points added vs an average player per 100 possessions (— = not yet rated) · ± = typical PTS range (80%).

Source: per-slate minutes + player-rate projections, availability-adjusted (minutes → 200, points scaled to the simulation score).

A deeper look

What tonight means

A win tonight puts **SEA**'s playoff chances at **0%** — a loss drops them to **0%**.

Across both teams that makes this the **9th-biggest playoff-swing game** of this week's 10 remaining games.

MIN

if they win

100%

if they lose

100%

Playoff swing: 0 points · Typical seed: about 2nd either way.

SEA

if they win

0%

if they lose

0%

Playoff swing: 0 points · Typical seed: about 14th either way.

Source: the rest of the season replayed 10,000 times, split by tonight's result (may differ from the headline odds by a fraction of a point — same simulation, different run counts).

Starting-five skill profiles

Source: league-percentile bars from each player's most recent full-season profile (the 2025 season); first-year players have none yet. Estimated from public play-by-play.

Scoring ranges — projected starters

Each bar spans a starter's likely points — light = wider range, dark navy = most likely, tick = our projection. Scale 0–25 pts.

Appendix — how the numbers are made

- Scores, totals & the margin distribution = a 1M-run Monte-Carlo simulation; spread = regression + home recalibration; the margin curve & ranges are calibrated intervals (~89% observed coverage at the 90% target); playoff leverage = the season replayed 10,000 times, split by tonight's result.
- Player values = per-minute rates (last-10-games form → season → positional average) × projected minutes, team points scaled to the simulation total. Minutes = per-slate projection + injury redistribution under per-player caps — OUT players removed and their minutes reallocated (box sums to 200; a "provisional" team has rotation players missing from tonight's model, so its box shows only the modeled minutes and is not inflated).
- Some player-level estimates lean on the limited public play-by-play for this league; richer tracking data would sharpen them.

THE SEASON SO FAR (through 998 games): Our spread calls miss by an average of 10.8 points · when we make a team a 60%+ favorite, they win 68% of the time · player minutes within +/-6.0, points within +/-3.9 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)
Recent monthly accuracy (average miss, lower is better): May '25 9.9 · Jun '25 10.7 · Jul '25 11.7 · Aug '25 10.0 · Sep '25 10.3 · May '26 11.1 · Jun '26 10.6 · Jul '26 12.2 points.
all-games: spread +/-10.8 · minutes +/-6.0 · points +/-3.8
