

OUR CALL

GSV WIN PROB

GSV by 10.3

67%

WAS win 33% · pick'em (0) · GSV win 67%

Shaded area each side of pick'em = each team's win chance; dark tick = our call.

Projected score **GSV 82 — WAS 76** · Total 167

Some inputs served from the most-recent available build (winprob) — see companion file for detail.

Read

GSV is a clear favorite (67% to win). The catch: 1 projected bench spot(s) lean on a positional average (little game data yet) — treat those minutes as low-confidence.

- **GSV** is a clear favorite here (67% to win); we project **GSV 82, WAS 76**.
- The model's on-court player ratings tilt to **GSV** — its top three rate **+5.2** combined vs **+2.2** on the other side (impact = points added vs an average player; see the box).
- Availability: **GSV** without I. Rupert (1 OUT) — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the **GSV** margin lands between **-11** and **+25** (+ = GSV ahead) — single games swing a lot, and even so GSV loses outright about 33% of the time; a big projected margin like this is the hardest kind to hit exactly.
- 1 deep-bench player(s) projected from a positional average (little game data yet) — grouped in the box and treated as low-confidence.

Injuries & availability — out of the projected box

TEAM	PLAYER	STATUS / CAUSE	GAMES MISSED	EXP. RETURN
GSV	Iliana Rupert	Personal	—	TBD

Cause read from the injury feed's report; games missed = the team's games played since the player last appeared; expected return as reported ('TBD' = no date given).

Players to watch

Each side's top two projected scorers — biggest game-changer first (impact = points added vs an average player); the % is the team's scoring each carries.

- WAS** **K. Iriafen** 14 pts (18% of WAS's scoring) / 9 reb / 2 ast in 29 min · +0.7 impact · **S. Austin** 12 pts (15% of WAS's scoring) / 8 reb / 2 ast in 23 min · +0.0 impact
- GSV** **V. Burton** 11 pts (14% of GSV's scoring) / 4 reb / 6 ast in 30 min · +2.7 impact · **J. Salaun** 13 pts (16% of GSV's scoring) / 5 reb / 1 ast in 26 min · -0.4 impact

Projected box

Big # = jersey · bold above the line = projected starters (top-5 minutes) · IMPACT = points added vs an average player per 100 possessions (— = not yet rated).
Source: per-slate minutes + player-rate projections, availability-adjusted (minutes → 200, points scaled to the simulation score).

A deeper look

What tonight means

A win tonight puts **WAS**'s playoff chances at **33%** — a loss drops them to **20%**.

Across both teams that makes this the **2nd-biggest playoff-swing game** of this week's 10 remaining games.

WAS

if they win

33%

if they lose

20%

Playoff swing: 13 points · Typical seed: about 9th with a win, 10th with a loss.

GSV

if they win

100%

if they lose  **100%**

Playoff swing: **0 points** · Typical seed: about 3rd with a win, 4th with a loss.

Source: the rest of the season replayed 10,000 times, split by tonight's result (may differ from the headline odds by a fraction of a point — same simulation, different run counts).

Season odds — playoffs & title

Appendix — how the numbers are made

- Scores, totals & the margin distribution = a 1M-run Monte-Carlo simulation; spread = regression + home recalibration; the margin curve & ranges are calibrated intervals (~89% observed coverage at the 90% target); playoff leverage = the season replayed 10,000 times, split by tonight's result.
- Player values = per-minute rates (last-10-games form → season → positional average) × projected minutes, team points scaled to the simulation total. Minutes = per-slate projection + injury redistribution under per-player caps — OUT players removed and their minutes reallocated (box sums to 200; a "provisional" team has rotation players missing from tonight's model, so its box shows only the modeled minutes and is not inflated).
- Some player-level estimates lean on the limited public play-by-play for this league; richer tracking data would sharpen them.

THE SEASON SO FAR (through 998 games): Our spread calls miss by an average of 10.8 points · when we make a team a 60%+ favorite, they win 68% of the time · player minutes within +/-6.0, points within +/-3.9 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)
Recent monthly accuracy (average miss, lower is better): May '25 9.9 · Jun '25 10.7 · Jul '25 11.7 · Aug '25 10.0 · Sep '25 10.3 · May '26 11.1 · Jun '26 10.6 · Jul '26 12.2 points.
all-games: spread +/-10.8 · minutes +/-6.0 · points +/-3.8
