

MIN by 18.2

78%

POR win 22% · pick'em (0) · MIN win 78%

Shaded area each side of pick'em = each team's win chance; dark tick = our call.

Projected score MIN 84 — POR 77 · Total 170

Read

MIN is a clear favorite (78% to win). The catch: treat it as provisional — POR's rotation is missing player(s) from tonight's model, so the box below is not yet complete.

- MIN is a clear favorite here (78% to win); we project **MIN 84, POR 77**.
- Projected as an average-tempo game (total near **170**).
- Availability: **MIN** without E. Cechova, N. Collier (2 OUT); **POR** without H. Winterburn, S. Feagin, M. Gustafson (3 OUT) [+1 GTD] — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the **MIN** margin lands between **-3** and **+33** (+ = MIN ahead) — single games swing a lot, and even so MIN loses outright about 22% of the time; a big projected margin like this is the hardest kind to hit exactly.

Injuries & availability — out of the projected box

TEAM	PLAYER	STATUS / CAUSE	GAMES MISSED	EXP. RETURN
POR	Holly Winterburn	Personal	0	Jul 22
POR	Sania Feagin	Knee	8	TBD
POR	Megan Gustafson	Personal	1	Jul 22
POR	Karlie Samuelson	Day-to-day · finger	0	Jul 18
MIN	Emma Cechova	Knee — out for season	22	Out for season
MIN	Napheesa Collier	Ankle	—	Jul 20

Cause read from the injury feed's report; games missed = the team's games played since the player last appeared; expected return as reported ('TBD' = no date given).

Players to watch

Each side's top two projected scorers — biggest game-changer first (impact = points added vs an average player); the % is the team's scoring each carries.

- POR** **B. Carleton** 11 pts (14% of POR's scoring) / 4 reb / 2 ast in 27 min · +0.7 impact · **C. Leite** 10 pts (14% of POR's scoring) / 2 reb / 4 ast in 17 min · +0.1 impact
- MIN** **K. McBride** 22 pts (26% of MIN's scoring) / 4 reb / 3 ast in 39 min · +1.6 impact · **C. Williams** 16 pts (19% of MIN's scoring) / 6 reb / 4 ast in 35 min · +1.2 impact

Projected box

Big # = jersey · bold above the line = projected starters (top-5 minutes) · IMPACT = points added vs an average player per 100 possessions (— = not yet rated).
Source: per-slate minutes + player-rate projections, availability-adjusted (minutes → 200, points scaled to the simulation score).

POR

Projection provisional — roster incomplete (players missing from tonight's model).

A deeper look

What tonight means

A win tonight puts **POR**'s playoff chances at **5%** — a loss drops them to **2%**.
 Across both teams that makes this the **8th-biggest playoff-swing game** of this week's 10 remaining games.

Source: the rest of the season replayed 10,000 times, split by tonight's result (may differ from the headline odds by a fraction of a point — same simulation, different run counts).

Season odds — playoffs & title

Source: live 1M-run season simulation (the board's odds core).

Starting-five skill profiles

Source: league-percentile bars from each player's most recent full-season profile (the 2025 season); first-year players have none yet. Estimated from public play-by-play.

Appendix — how the numbers are made

- Scores, totals & the margin distribution = a 1M-run Monte-Carlo simulation; spread = regression + home recalibration; the margin curve & ranges are calibrated intervals (~89% observed coverage at the 90% target); playoff leverage = the season replayed 10,000 times, split by tonight's result.
- Player values = per-minute rates (last-10-games form → season → positional average) × projected minutes, team points scaled to the simulation total. Minutes = per-slate projection + injury redistribution under per-player caps — OUT players removed and their minutes reallocated (box sums to 200; a "provisional" team has rotation players missing from tonight's model, so its box shows only the modeled minutes and is not inflated).
- Some player-level estimates lean on the limited public play-by-play for this league; richer tracking data would sharpen them.

THE SEASON SO FAR (through 998 games): Our spread calls miss by an average of 10.8 points · when we make a team a 60%+ favorite, they win 68% of the time · player minutes within +/-6.0, points within +/-3.9 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)
Recent monthly accuracy (average miss, lower is better): May '25 9.9 · Jun '25 10.7 · Jul '25 11.7 · Aug '25 10.0 · Sep '25 10.3 · May '26 11.1 · Jun '26 10.6 · Jul '26 12.2 points.
all-games: spread +/-10.8 · minutes +/-6.0 · points +/-3.8
