Projected score DAL 90 — POR 79 · Total 174 (market 176)

Some inputs served from the most-recent available build (winprob) — see companion file for detail.

Read

DAL is a heavy favorite (81% to win). The catch: DAL is down a rotation piece — A. Fudd (impact +1.2) is OUT and already removed from the projection below.

- DAL is a heavy favorite here (81% to win); we project DAL 90, POR 79.
- Projected as a higher-scoring game (total near 174).
- Availability: DAL without A. James, A. Fudd, C. Verona (3 OUT); POR without L. Geiselsoder, S. Williams, S. Ashlee Barker... (4 OUT) — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the DAL margin lands between -6 and +26 (+ = DAL ahead) — single games swing a lot, and even so DAL loses outright about 19% of the time.

A deeper look

What tonight means

A win tonight puts DAL's playoff chances at 100% — a loss drops them to 100%.

Across both teams that makes this the 2nd-biggest playoff-swing game of this week's 17 remaining games.

This is an exact account of THAT GAME, not a rating of these players. It adds up every swing in win probability that happened while each player was on the floor. Because it describes a game that was already played rather than predicting one, it is exact — but it is also close to useless as a forecast: a player's number here tells us almost nothing about her next game, and it is not a ranking of who is good. Read it as a record of how this one night unfolded.

Win probability is in points, so +10.0 means a player was on the floor for swings worth ten points of it. Each total is simply the numbers beside it added up. They run large because five players share the floor for every move and each is charged with all of it, so a side adds to five times its own swing in the game; that holds to the last decimal before rounding, and the two sides can differ by a tenth once each player is rounded. POR won that night.

Sources: rotation impact = each player's on-court impact rating weighted by the minutes we project her to play tonight; records, form and past meetings = completed game results only, never tonight's. Who moved the win probability = every on-court stint of that one completed meeting added up per player — a description of that game, never a forecast and never a season number.
