NYL is a clear favorite (74% to win). The catch: NYL is down a rotation piece — L. Fiebich (impact +2.6) is OUT and already removed from the projection below.

- NYL is a clear favorite here (74% to win); we project NYL 91, LAS 84.
- The model's on-court player ratings tilt to NYL — its top three rate +4.2 combined vs +1.9 on the other side (impact = points added vs an average player; see the box).
- Availability: NYL without L. Fiebich, S. Sabally (2 OUT); LAS without M. Akoa Makani (1 OUT) — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the NYL margin lands between -9 and +23 (+ = NYL ahead) — single games swing a lot, and even so NYL loses outright about 26% of the time.

Injuries & availability — out of the projected box

TEAM	PLAYER	STATUS / CAUSE	GAMES MISSED	EXP. RETURN
LAS	Monique Akoa Makani	Ankle	2	Aug 15
NYL	Leonie Fiebich	Out	13	Aug 18
NYL	Satou Sabally	Out	16	Aug 18

Cause read from the injury feed's report; games missed = the team's games played since the player last appeared; expected return as reported ('TBD' = no date given).

A deeper look

What tonight means

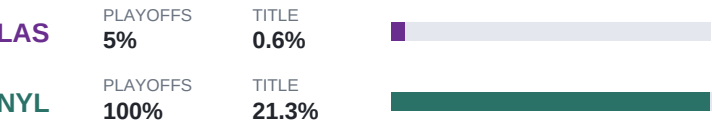

A win tonight puts LAS's playoff chances at 0% — a loss drops them to 0%.

Across both teams that makes this the **3rd-biggest playoff-swing game** of this week's 11 remaining games.

Every projected line

The grey figure under each number is the range we expect it to land in four times in five. It is deliberately wide — a range that looks confident and is wrong is worse than a wide one that is right. A number with no grey line under it is one we hold no fitted range for. IMPACT is points added versus an average player per 100 possessions; a dagger means the rating comes from her earlier record because she has no floor time this season yet, and a dash means we hold no rating for her at all.

Appendix — how the numbers are made

- Scores, totals & the margin distribution = a 1M-run Monte-Carlo simulation; spread = regression + home recalibration; the margin curve & ranges are calibrated intervals (~89% observed coverage at the 90% target); playoff leverage = the season replayed 10,000 times, split by tonight's result.
- Player values = per-minute rates (last-10-games form → season → her own career, or her college record translated into WNBA rates, → positional average) × projected minutes, team points scaled to the simulation total. A row built mostly from a prior rather than from this season says so on the row itself. Minutes = per-slate projection + injury redistribution under per-player caps — OUT players removed and their minutes reallocated (box sums to 200; a "provisional" team has rotation players missing from tonight's model, so its box shows only the modeled minutes and is not inflated).
- Some player-level estimates lean on the limited public play-by-play for this league; richer tracking data would sharpen them.

THE SEASON SO FAR (through 426 games): Our spread calls miss by an average of 10.7 points · when we make a team a 60%+ favorite, they win 72% of the time · player minutes within +/-5.2, points within +/-4.2 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)
Recent monthly accuracy (average miss, lower is better): May '25 9.9 · Jun '25 10.7 · Jul '25 11.7 · Aug '25 10.0 · Sep '25 10.3 · May '26 11.1 · Jun '26 10.6 · Jul '26 12.2 points.
all-games: spread +/-10.7 · minutes +/-5.3 · points +/-4.1
