

WAS by 4.5

56%

POR win 44% · pick'em (0) · WAS win 56%

Shaded area each side of pick'em = each team's win chance; dark tick = our call. Source: the game's simulated margin distribution. Sources differ: calibrated median +4.5 vs raw simulation mean -0.3 — the calibrated distribution is shown.

Projected score WAS 78 — POR 78 · Total 164

The spread is our regression's call (WAS -4.5); the projected box follows our game simulation (implies +0.2); the margin range covers both.

Read

- **WAS** is the narrow side of a near coin-flip here (56% to win); we project **WAS 78, POR 78**.
- Projected as an average-tempo game (total near **164**).
- Availability: **POR** without S. Feagin, M. Gustafson (2 OUT) [+1 GTD] — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the **WAS** margin lands between **-16** and **+19** (+ = WAS ahead) — single games swing a lot, and even so WAS loses outright about 44% of the time.
- 1 deep-bench player(s) projected from a positional average (little game data yet) — grouped in the box and treated as low-confidence.

Injuries & availability — out of the projected box

TEAM	PLAYER	STATUS / CAUSE	GAMES MISSED	EXP. RETURN
POR	Sania Feagin	Knee	7	TBD
POR	Megan Gustafson	Personal	0	Jul 18
POR	Teja Oblak	Day-to-day · illness	0	Jul 16

Cause read from the injury feed's report; games missed = the team's games played since the player last appeared; expected return as reported ('TBD' = no date given).

Players to watch

Each side's top two projected scorers — biggest game-changer first (impact = points added vs an average player); the % is the team's scoring each carries.

- POR** **B. Carleton** 12 pts (15% of POR's scoring) / 4 reb / 2 ast in 29 min · +0.7 impact · **C. Leite** 14 pts (18% of POR's scoring) / 3 reb / 6 ast in 26 min · +0.1 impact
- WAS** **K. Iriafen** 12 pts (15% of WAS's scoring) / 8 reb / 2 ast in 24 min · +0.7 impact · **S. Citron** 14 pts (18% of WAS's scoring) / 4 reb / 3 ast in 29 min · +0.6 impact

Projected box

Big # = jersey · bold above the line = projected starters (top-5 minutes) · IMPACT = points added vs an average player per 100 possessions (— = not yet rated) · ± = typical PTS range (80%).

Source: per-slate minutes + player-rate projections, availability-adjusted (minutes → 200, points scaled to the simulation score).

A deeper look

What tonight means

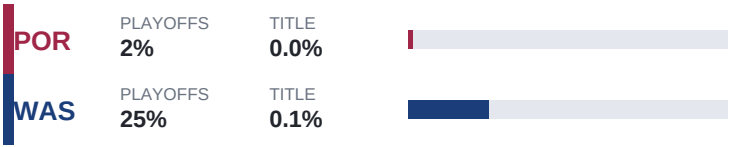

A win tonight puts **WAS**'s playoff chances at **32%** — a loss drops them to **20%**.

Across both teams that makes this the **1st-biggest playoff-swing game** of this week's 11 remaining games.

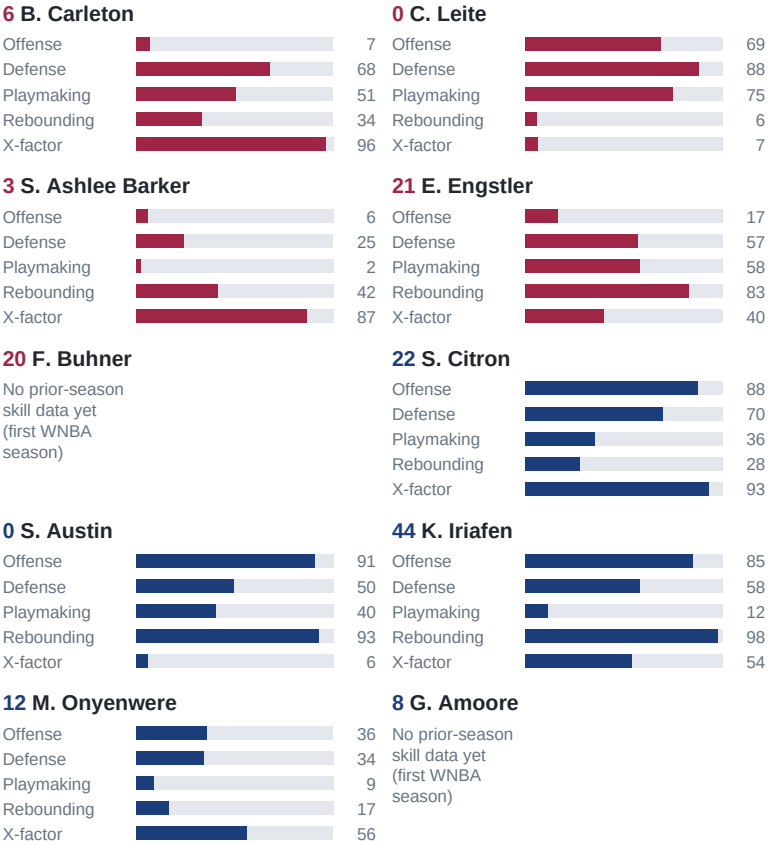

Source: the rest of the season replayed 10,000 times, split by tonight's result (may differ from the headline odds by a fraction of a point — same simulation, different run counts).

Season odds — playoffs & title

Source: live 1M-run season simulation (the board's odds core).

Starting-five skill profiles

Source: league-percentile bars from each player's most recent full-season profile (the 2025 season); first-year players have none yet. Estimated from public play-by-play.

Final-margin ranges — how sure are we?

Best estimate: WAS by 4.5 (WAS win 56%, POR win 44%). The full margin curve is shown under the call at the top of this report.

Typical final margins — 50%: [-8, +11] · 80%: [-16, +19] · 90%: [-21, +25] (home frame; a -ve number = the away team wins by that much).

Source: the game's simulated margin distribution — density reconstructed for display from the calibrated 50/80/90 margin intervals (7 quantile knots), tails tapering.

Scoring ranges — projected starters

Each projected starter's points with the typical 80% and 90% ranges (empirical PTS intervals around the projection). '?' = low-confidence interval; a starter with no interval is omitted.

PLAYER	PTS	80% RANGE	90% RANGE
B. Carleton	11.6	5–18	4–20
C. Leite	14.1	7–21	6–23
S. Ashlee Barker	9.3	5–14	4–15
E. Engstler	8.5	4–13	3–14
F. Buhner	5.8	1–10	0–12

PLAYER	PTS	80% RANGE	90% RANGE
S. Austin	10.9	5–17	3–18
K. Iriafen	11.7	4–20	2–22
M. Onyenwere	7.3	1–14	0–15
G. Amooore	6.4	0–13?	0–16?

How these numbers are made

- Scores, totals & the margin distribution = a 1M-run Monte-Carlo simulation; spread = regression + home recalibration; the margin curve & ranges are calibrated intervals (~89% observed coverage at the 90% target); playoff leverage = the season replayed 10,000 times, split by tonight's result.
- Player values = per-minute rates (last-10-games form → season → positional average) × projected minutes, team points scaled to the simulation total. Minutes = per-slate projection + injury redistribution under per-player caps — OUT players removed and their minutes reallocated (box sums to 200; a “provisional” team has rotation players missing from tonight’s model, so its box shows only the modeled minutes and is not inflated).
- Some player-level estimates lean on the limited public play-by-play for this league; richer tracking data would sharpen them.

THE SEASON SO FAR (through 998 games): Our spread calls miss by an average of 10.8 points · when we make a team a 60%+ favorite, they win 68% of the time · player minutes within +/-5.9, points within +/-3.8 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)
Recent monthly accuracy (average miss, lower is better): May '25 9.9 · Jun '25 10.7 · Jul '25 11.7 · Aug '25 10.0 · Sep '25 10.3 · May '26 11.1 · Jun '26 10.6 · Jul '26 12.2 points.
all-games: spread +/-10.8 · minutes +/-5.9 · points +/-3.8
