

Early-morning deep synthesis. Assembles the already-baked projection bundle with the league scouting boards — nothing is recomputed. Companion to the gameday one-pager; this is the scouting-and-reasoning layer.

Fair-value readout (audit, not a directional call)

- *These are the platform's own fair lines — an audit of the model, not a directional call. No market price is quoted or implied.*

POR — opponent scouting edges

- **Rim protection (last season):** no qualified rim protector projects onto the floor (1 graded on a sub-40-shot sample — too thin to rank) — TOR's at-rim scorers face a soft interior.
