Read

MIN is a heavy favorite (89% to win).

- MIN is a heavy favorite here (89% to win); we project **MIN 84, TOR 75**.
- Projected as a higher-scoring game (total near **175**).
- Availability: **MIN** without E. Cechova (1 OUT); **TOR** without B. Sykes (1 OUT) [+3 GTD] — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the **MIN** margin lands between **-3** and **+31** (+ = MIN ahead) — single games swing a lot, and even so MIN loses outright about 11% of the time; a big projected margin like this is the hardest kind to hit exactly.

Injuries & availability — out of the projected box

A deeper look

What tonight means

A win tonight puts **TOR**'s playoff chances at **0%** — a loss drops them to **0%**.
 Across both teams that makes this the **19th-biggest playoff-swing game** of this week's 19 remaining games.

Source: the rest of the season replayed 10,000 times, split by tonight's result (may differ from the headline odds by a fraction of a point — same simulation, different run counts).

Appendix — how the numbers are made

- Scores, totals & the margin distribution = a 1M-run Monte-Carlo simulation; spread = regression + home recalibration; the margin curve & ranges are calibrated intervals (~89% observed coverage at the 90% target); playoff leverage = the season replayed 10,000 times, split by tonight's result.
- Player values = per-minute rates (last-10-games form → season → positional average) × projected minutes, team points scaled to the simulation total. Minutes = per-slate projection + injury redistribution under per-player caps — OUT players removed and their minutes reallocated (box sums to 200; a "provisional" team has rotation players missing from tonight's model, so its box shows only the modeled minutes and is not inflated).
- Some player-level estimates lean on the limited public play-by-play for this league; richer tracking data would sharpen them.

THE SEASON SO FAR (through 998 games): Our spread calls miss by an average of 10.8 points · when we make a team a 60%+ favorite, they win 68% of the time · player minutes within +/-6.0, points within +/-3.9 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)
Recent monthly accuracy (average miss, lower is better): May '25 9.9 · Jun '25 10.7 · Jul '25 11.7 · Aug '25 10.0 · Sep '25 10.3 · May '26 11.1 · Jun '26 10.6 · Jul '26 12.2 points.
all-games: spread +/-10.8 · minutes +/-6.0 · points +/-3.8
