

Rolling accuracy: insufficient history (grading begins 2026-07-08).

SPREAD	WIN PROB	PROJ SCORE	90% MARGIN
GSV -4.2	TOR 42% / GSV 58%	TOR 77.4 — GSV 81.1	[-29, +17]

Total — our model: 168.0 · market close: n/a (our regime-refreshed total model; market shown for context, not borrowed. The projected score split above is the sim decomposition; this line is the calibrated total.)

Title odds: GSV 3.1% (+0.0pp) · TOR 0.0% (-0.0pp)

Style: Toronto's ball movement vs Golden State's three-point volume — a style contrast, not a prediction.

Read

- Model team-strength gap favors **GSV** by **4.2 pts** (v12 OLS, home-recentered); win probability **58%**.
- Availability: **TOR** without K. Rice, B. Sykes, T. Fágbenlé... (5 OUT); **GSV** without M. Sowah, I. Rupert, A. Prectel (3 OUT) — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- Uncertainty: 90% margin interval [-28.7, +17.5] (home), width 46.2 pts — wide single-game spread.
- 6 deep-bench player(s) projected on the cold-start prior (thin basis) — grouped in the box and treated as low-confidence.

Availability (excluded from the box; minutes redistributed)

Team	Player	Status	Injury	Return
GSV	Miela Sowah	out	Out	Jul 10
GSV	Iliana Rupert	out	Out	
GSV	Ashten Prectel	out	Out	Jul 10

5 PM report impact

- **5 PM report impact** — no change vs the 3 PM snapshot (stable slate).

How these numbers are made

- Player values = per-minute rates (rolling-10 recent form, season fallback, positional prior for cold-start) × projected minutes; team scoring is renormalized to the simulation total.
- Minutes = v6 per-slate projection + injury redistribution under per-player caps — OUT players removed, their minutes reallocated to the healthy rotation, no player over their cap (box sums to 200).
- Scores / totals = means of a 1M-run Monte-Carlo simulation.
- Spread = regression (v12 OLS) + home recalibration.
- Uncertainty = calibrated conformal interval (~89% observed coverage at the 90% target).

THE SEASON SO FAR (through 143 games):

Our spread calls miss by an average of 10.9 points · when we make a team a 60%+ favorite, they win 66% of the time · totals not yet tracked as-of · player minutes within +/-9.8, points within +/-6.0 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)

all-games: spread +/-10.9 · minutes +/-9.8 · points +/-6.0
