

LAS by 5.0

58%

PHO win 42% · pick'em (0) · LAS win 58%

Shaded area each side of pick'em = each team's win chance; dark tick = our call.

Projected score LAS 85 — PHO 82 · Total 175

Some inputs served from the most-recent available build (winprob) — see companion file for detail.

Read

LAS is a slight favorite (58% to win). The catch: LAS is down a rotation piece — K. Plum (impact +2.7) is OUT and already removed from the projection below.

- LAS is a slight favorite here (58% to win); we project LAS 85, PHO 82.
- The model's on-court player ratings tilt to PHO — its top three rate +3.9 combined vs +1.9 on the other side (impact = points added vs an average player; see the box).
- Availability: LAS without K. Williams, K. Plum (2 OUT); PHO without J. Nogic (1 OUT) — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the LAS margin lands between -16 and +20 (+ = LAS ahead) — single games swing a lot, and even so LAS loses outright about 42% of the time.

Injuries & availability — out of the projected box

TEAM	PLAYER	STATUS / CAUSE	GAMES MISSED	EXP. RETURN
PHO	Jovana Nogic	Not injury related	11	TBD
LAS	Kiana Williams	Hand	2	Jul 22
LAS	Kelsey Plum	Lower leg	9	Jul 28

Cause read from the injury feed's report; games missed = the team's games played since the player last appeared; expected return as reported ('TBD' = no date given).

Players to watch

Each side's top two projected scorers — biggest game-changer first (impact = points added vs an average player); the % is the team's scoring each carries.

PHO A. Thomas 12 pts (15% of PHO's scoring) / 6 reb / 6 ast in 29 min · +2.3 impact · K. Copper 17 pts (21% of PHO's scoring) / 3 reb / 1 ast in 27 min · +0.6 impact

LAS N. Ogwumike 16 pts (19% of LAS's scoring) / 8 reb / 4 ast in 29 min · +0.5 impact · D. Hamby 14 pts (17% of LAS's scoring) / 6 reb / 2 ast in 29 min · +0.4 impact

Projected box

Big # = jersey · bold above the line = projected starters (top-5 minutes) · IMPACT = points added vs an average player per 100 possessions (— = not yet rated).

Source: per-slate minutes + player-rate projections, availability-adjusted (minutes → 200, points scaled to the simulation score).

A deeper look

What tonight means

A win tonight puts **LAS's** playoff chances at **69%** — a loss drops them to **53%**.

Across both teams that makes this the **1st-biggest playoff-swing game** of this week's 6 remaining games.

Source: the rest of the season replayed 10,000 times, split by tonight's result (may differ from the headline odds by a fraction of a point — same simulation, different run counts).

Source: live 1M-run season simulation (the board's odds core).

Starting-five skill profiles

Source: league-percentile bars from each player's most recent full-season profile (the 2025 season); first-year players have none yet. Estimated from public play-by-play.

Appendix — how the numbers are made

- Scores, totals & the margin distribution = a 1M-run Monte-Carlo simulation; spread = regression + home recalibration; the margin curve & ranges are calibrated intervals (~89% observed coverage at the 90% target); playoff leverage = the season replayed 10,000 times, split by tonight's result.
- Player values = per-minute rates (last-10-games form → season → positional average) × projected minutes, team points scaled to the simulation total. Minutes = per-slate projection + injury redistribution under per-player caps — OUT players removed and their minutes reallocated (box sums to 200; a "provisional" team has rotation players missing from tonight's model, so its box shows only the modeled minutes and is not inflated).
- Some player-level estimates lean on the limited public play-by-play for this league; richer tracking data would sharpen them.

THE SEASON SO FAR (through 998 games): Our spread calls miss by an average of 10.8 points · when we make a team a 60%+ favorite, they win 68% of the time · player minutes within +/-6.0, points within +/-3.9 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)
Recent monthly accuracy (average miss, lower is better): May '25 9.9 · Jun '25 10.7 · Jul '25 11.7 · Aug '25 10.0 · Sep '25 10.3 · May '26 11.1 · Jun '26 10.6 · Jul '26 12.2 points.
all-games: spread +/-10.8 · minutes +/-6.0 · points +/-3.8
