Read

LAS is the narrow side of a near coin-flip (53% to win). The catch: CON is down a rotation piece — **B. Griner** (impact +1.1) is OUT and already removed from the projection below.

- **LAS** is the narrow side of a near coin-flip here (53% to win); we project **LAS 86, CON 85**.
- The model's on-court player ratings tilt to **CON** — its top three rate **+4.9** combined vs **+1.9** on the other side (impact = points added vs an average player; see the box).
- Availability: **CON** without A. Edwards, B. Griner, M. Kliundikova (3 OUT); **LAS** 3 GTD (E. Wheeler, M. Akoa Makani) — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the **LAS** margin lands between **-15** and **+17** (+ = LAS ahead) — single games swing a lot, and even so LAS loses outright about 47% of the time.

CON leads the season series 1-0. 05-30 at CON: LAS 81–CON 84. In 2025 they met 3 times, LAS winning 3.

Who moved the win probability on 05-30 — LAS 81–CON 84.

This is an exact account of THAT GAME, not a rating of these players. It adds up every swing in win probability that happened while each player was on the floor. Because it describes a game that was already played rather than predicting one, it is exact — but it is also close to useless as a forecast: a player's number here tells us almost nothing about her next game, and it is not a ranking of who is good. Read it as a record of how this one night unfolded.

Win probability is in points, so +10.0 means a player was on the floor for swings worth ten points of it. Each total is simply the numbers beside it added up. They run large because five players share the floor for every move and each is charged with all of it, so a side adds to five times its own swing in the game; that holds to the last decimal before rounding, and the two sides can differ by a tenth once each player is rounded. CON won that night.

Sources: rotation impact = each player's on-court impact rating weighted by the minutes we project her to play tonight; records, form and past meetings = completed game results only, never tonight's. Who moved the win probability = every on-court stint of that one completed meeting added up per player — a description of that game, never a forecast and never a season number.
