

Early-morning deep synthesis. Assembles the already-baked projection bundle with the league scouting boards — nothing is recomputed. Companion to the gameday one-pager; this is the scouting-and-reasoning layer.

Fair-value readout (audit, not a directional call)

- **Fair spread:** WAS by 5.9 (model home-margin +5.9).
- **Fair projected score:** TOR 72.2 — WAS 86.9.
- **Fair total:** 159.1.
- **Rest:** WAS 4d / TOR 1d — WAS rested (+3d).
- *These are the platform's own fair lines — an audit of the model, not a directional call. No market price is quoted or implied.*

TOR — opponent scouting edges

- **Rim protection (last season):** no qualified rim protector projects onto the floor (1 graded on a sub-40-shot sample — too thin to rank) — WAS's at-rim scorers face a soft interior.

TOR — rotation reasoning

- **Out (4):** Julie Allemand, Nyara Sabally, Maria Conde, Zaay Green — their minutes are redistributed across the rotation below.
- **Projected top-5 minutes:** Marina Mabrey (37), Brittney Sykes (35), Kiki Rice (33), Laura Juskaite (30), Isabelle Harrison (28).

WAS — opponent scouting edges

- **Rim protection (last season):** no qualified rim protector projects onto the floor — TOR's at-rim scorers face a soft interior.
- **Zone scoring — Shakira Austin:** league-board shot-maker (At the rim, +12.8 PAX/100).
- **Elite finisher:** Sonia Citron (+12.0 PAX/100 overall).

WAS — rotation reasoning

- **Projected top-5 minutes:** Sonia Citron (32), Shakira Austin (30), Kiki Iriafen (28), Michaela Onyenwere (26), Georgia Amoore (22).
- **Provisional basis (read with caution):** Georgia Amoore [rookie_prior] — projected off a thin / prior-shrunk sample, not a settled rolling rate.

Matchup implication

- **TOR at the rim:** WAS projects no qualified rim protector on the floor — TOR's interior scorers face a soft rim (last-season grades).
- **WAS at the rim:** TOR projects no qualified rim protector on the floor — WAS's interior scorers face a soft rim (last-season grades).

Generated 2026-08-19T11:26:28Z by scripts/deep_scouting_report.py — incremental assembly of docs/gameday/2026-08-19/_manifest.json + site/scouting.json + site/scouting_zone.json. No DB write, no model re-fit; read-only join of baked outputs.
