

OUR CALL

LVA WIN PROB

LVA by 1.4

55%

LVA win 55% · pick'em (0) · WAS win 45%

Shaded area each side of pick'em = each team's win chance; dark tick = our call.

Projected score WAS 78 — LVA 82 · Total 168

Read

LVA is the narrow side of a near coin-flip (55% to win). The catch: the edge sits inside the noise — the 80% margin range still covers a win for either side, so read this as a lean, not a confident call.

- LVA is the narrow side of a near coin-flip here (55% to win); we project **LVA 82, WAS 78**.
- The model's on-court player ratings tilt to **LVA** — its top three rate **+4.3** combined vs **+2.2** on the other side (impact = points added vs an average player; see the box).
- Availability: **LVA** without K. Bell, J. Barker (2 OUT) — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- How sure: 4 games in 5 the **LVA** margin lands between **-15** and **+19** (+ = LVA ahead) — single games swing a lot, and even so LVA loses outright about 45% of the time.
- 1 deep-bench player(s) projected from a positional average (little game data yet) — grouped in the box and treated as low-confidence.

Injuries & availability — out of the projected box

TEAM	PLAYER	STATUS / CAUSE	GAMES MISSED	EXP. RETURN
LVA	Kierstan Bell	Leg	2	Jul 28
LVA	Janiah Barker	Leg — out for season	—	Out for season

Cause read from the injury feed's report; games missed = the team's games played since the player last appeared; expected return as reported ('TBD' = no date given).

Players to watch

Each side's top two projected scorers — biggest game-changer first (impact = points added vs an average player); the % is the team's scoring each carries.

- LVA** **A. Wilson** 20 pts (24% of LVA's scoring) / 9 reb / 2 ast in 29 min · +1.6 impact · **J. Young** 13 pts (16% of LVA's scoring) / 4 reb / 6 ast in 31 min · +1.4 impact
- WAS** **S. Citron** 14 pts (18% of WAS's scoring) / 3 reb / 3 ast in 30 min · +0.6 impact · **S. Austin** 12 pts (16% of WAS's scoring) / 9 reb / 2 ast in 25 min · +0.0 impact

Projected box

Big # = jersey · bold above the line = projected starters (top-5 minutes) · IMPACT = points added vs an average player per 100 possessions (— = not yet rated) · ± = typical PTS range (80%).

Source: per-slate minutes + player-rate projections, availability-adjusted (minutes → 200, points scaled to the simulation score).

A deeper look

What tonight means

A win tonight puts **WAS**'s playoff chances at **40%** — a loss drops them to **26%**.
Across both teams that makes this the **2nd-biggest playoff-swing game** of this week's 6 remaining games.

Source: the rest of the season replayed 10,000 times, split by tonight's result (may differ from the headline odds by a fraction of a point — same simulation, different run counts).

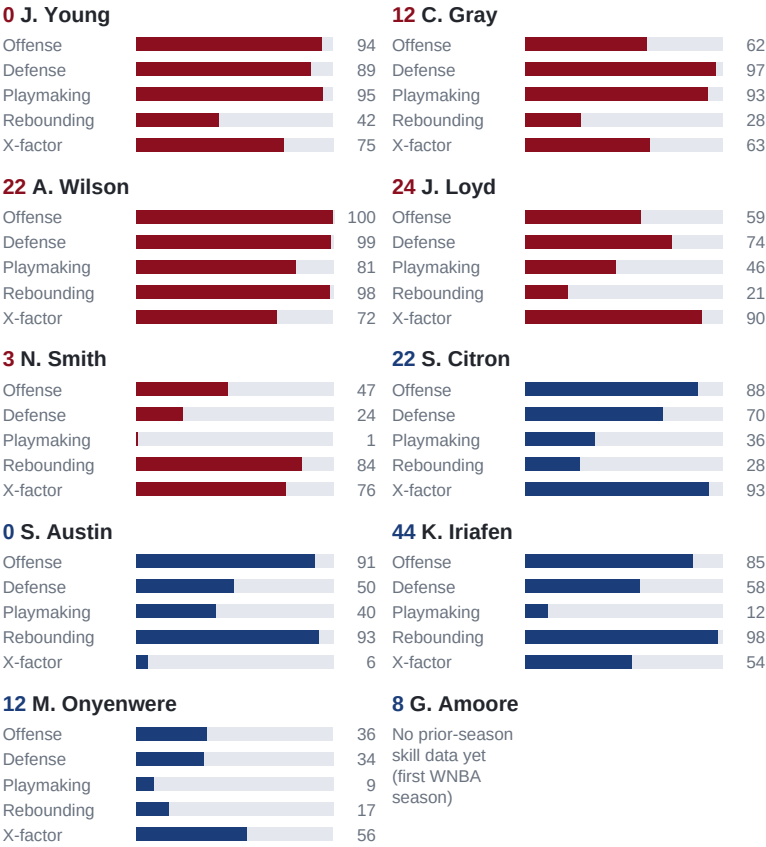

Season odds — playoffs & title

Source: live 1M-run season simulation (the board's odds core).

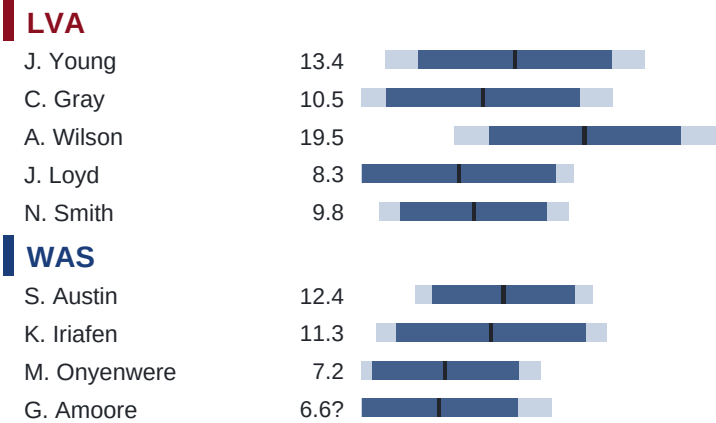

Starting-five skill profiles

Source: league-percentile bars from each player's most recent full-season profile (the 2025 season); first-year players have none yet. Estimated from public play-by-play.

Scoring ranges — projected starters

Each bar spans a starter's likely points — light = wider range, dark navy = most likely, tick = our projection. Scale 0–35 pts.

Appendix — how the numbers are made

• Scores, totals & the margin distribution = a 1M-run Monte-Carlo simulation; spread = regression + home recalibration; the margin curve & ranges are calibrated intervals (~89% observed coverage at the 90% target); playoff leverage = the season replayed 10,000 times, split by tonight's result.

- Player values = per-minute rates (last-10-games form → season → positional average) × projected minutes, team points scaled to the simulation total. Minutes = per-slate projection + injury redistribution under per-player caps — OUT players removed and their minutes reallocated (box sums to 200; a “provisional” team has rotation players missing from tonight’s model, so its box shows only the modeled minutes and is not inflated).
- Some player-level estimates lean on the limited public play-by-play for this league; richer tracking data would sharpen them.

THE SEASON SO FAR (through 998 games): Our spread calls miss by an average of 10.8 points · when we make a team a 60%+ favorite, they win 68% of the time · player minutes within +/-6.0, points within +/-3.9 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)
Recent monthly accuracy (average miss, lower is better): May '25 9.9 · Jun '25 10.7 · Jul '25 11.7 · Aug '25 10.0 · Sep '25 10.3 · May '26 11.1 · Jun '26 10.6 · Jul '26 12.2 points.
all-games: spread +/-10.8 · minutes +/-6.0 · points +/-3.8
