

Rolling accuracy: insufficient history (grading begins 2026-07-09).

SPREAD	WIN PROB	PROJ SCORE	90% MARGIN
IND -2.3	PHO 46% / IND 54%	PHO 83.0 — IND 82.6	[-27, +19]

Spread shown is the v12 regression (IND -2.3); the projected box reflects the simulation's score means (implies +0.4); the margin interval spans both.

Total — our model: 173.6 · market close: n/a (our regime-refreshed total model; market shown for context, not borrowed. The projected score split above is the sim decomposition; this line is the calibrated total.)

Title odds: IND 15.2% (-0.5pp) · PHO 1.6% (-0.1pp)

Read

- Model team-strength gap favors **IND** by **2.3 pts** (v12 OLS, home-recentered); win probability **54%**.
- Availability: **PHO** without S. Whitcomb, N. Mack, J. Nogie (3 OUT) [+1 GTD]; **IND** without C. Clark (1 OUT) [+2 GTD] — OUT players are excluded from the box; the minutes of any projected among them are redistributed into the rotation below.
- Schedule: **PHO** on 1 day(s) rest (short-rest / back-to-back spot).
- Uncertainty: 90% margin interval [-26.9, +19.3] (home), width 46.2 pts — wide single-game spread.
- 6 deep-bench player(s) projected on the cold-start prior (thin basis) — grouped in the box and treated as low-confidence.

Availability (excluded from the box; minutes redistributed)

Team	Player	Status	Injury	Return

Team	200.0	83.0				

How these numbers are made

- Player values = per-minute rates (rolling-10 recent form, season fallback, positional prior for cold-start) × projected minutes; team scoring is renormalized to the simulation total.
- Minutes = v6 per-slate projection + injury redistribution under per-player caps — OUT players removed, their minutes reallocated to the healthy rotation, no player over their cap (box sums to 200).
- Scores / totals = means of a 1M-run Monte-Carlo simulation.
- Spread = regression (v12 OLS) + home recalibration.
- Uncertainty = calibrated conformal interval (~89% observed coverage at the 90% target).

THE SEASON SO FAR (through 572 games):

Our spread calls miss by an average of 10.9 points · when we make a team a 60%+ favorite, they win 66% of the time · totals not yet tracked as-of · player minutes within +/-5.9, points within +/-3.8 (player lines: reconstructed day-before for all 143 games; live tracking began Jul 8.)

all-games: spread +/-10.9 · minutes +/-5.9 · points +/-3.8
